Re: Completion of Stabilization Activities at the Metcoa Site:
Pulaski, Pennsylvania

Dear Peter:

I have been authorized to inform you that ENSR Constructors (the contractor retained by the Metcoa Site Steering Committee) has completed the on-site stabilization activities contemplated in the Consent Agreement and Order signed by the Regional Administrator on September 14, 1988. The silt fence, waste pile and drum handling tasks required pursuant to the approved Work Plan, including final demobilization, were completed on Saturday October 28, 1989. Attached hereto is a copy of a letter from ENSR's John Englick confirming that the required work has been finished.

As you know, governmental representatives from both the Environmental Protection Agency and the Pennsylvania Department

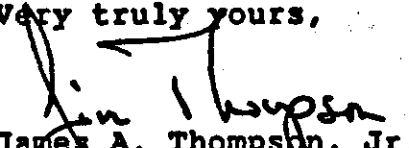

AR101296

of Environmental Resources were present at various points during the stabilization work. Although the Order contemplates that EPA may make a final inspection, I trust that you feel one is not necessary because of your knowledge of the activities that were performed.

Finally, I hope that the Steering Committee will receive confirmation from you or Jim Heenehan that the signatories to the Order have satisfied their obligations thereunder.

Please feel free to call me if you have any additional comments or questions relating to this matter.

Very truly yours,

James A. Thompson, Jr.
Co-counsel, Metcoa Site
Steering Committee
